Education

Georgia Institute of Technology | Atlanta, GA *August 2025 – Present*
B.S. in Electrical Engineering (Minor in Mathematics) GPA: 3.94/4.0
Planned B.S. in Mathematics and Computing Expected Graduation: Dec 2029
Georgia Tech Liang Prodigy Scholarship Recipient

Skills

Programming: Python, Java, MATLAB, JavaScript, C, HTML/CSS
Hardware: PCB design, soldering, circuit prototyping, oscilloscopes, ESP32, Teensy/Arduino
Engineering Tools: KiCad, EasyEDA, Fusion 360, Git, Bambu Studio; Blender
Languages: English, Chinese, Hebrew (basic)

Experience

InterStudio | Shanghai, China - *Intern* *Jan 2026 – Present*

- Interactive Design Startup at ShanghaiTech
- Designed and prototyped interactive electronic plants using optic fibers involving CAD, PCB Design and Arduino coding
- Co-authored "InterYard: Investigating E-Plants as Mediators for Attuning Human to Biorhythms in Future Cities," accepted as an Interactive Demo at CHI 2026

Georgia Institute of Technology | Atlanta, Georgia - *Math Undergraduate Teaching Assistant* *Aug 2026 – Present*
School of Mathematics

- Facilitate and engage students in weekly studio sessions of the course Intro to Linear Algebra
- Support students through office hours, exam proctoring and grading; commit 10 hours/week

Projects

Micromouse Robotics | Hardware Design & Development *June 2024 – Present*

Electrical Lead & New Member Mentor | RoboJackets RoboRacing Subteam at Georgia Tech *May 2026 – Present*

- Lead electrical development and mentor new members on circuit design, PCB design, and soldering
- Designed and routed a competition micromouse PCB in KiCad as part of RoboJackets; robot successfully navigated the maze at the 2026 APEC Micromouse Competition.

Independent Micromouse Hardware Development *Jul 2026 – Present*

- Designed a custom micromouse PCB in EasyEDA around an ESP32-S3-WROOM-1U, integrating motor control, power regulation, sensors, and supporting circuitry
- Optimized component placement and PCB routing for compactness and manufacturability; preparing for assembly and hardware validation.

Youth Science Innovation Practice Workstation | Team Micromouse, ShanghaiTech, Shanghai *Jul – Aug 2024*

- Ranked #1 Outstanding Participant among 100+ students in the program
- Invited back as a student representative to share technical learning experience with the next cohort in June 2025

Agentic Workflow | Georgia Tech College of Computing *Nov 2025 – Present*

- Architected and built an interactive storytelling agentic workflow including Gemini image generation and Elevenlabs music generation
- Won best demo for in-class pitch and continued development as personal project

Additional Interests

- Disc Golf: Competitive Georgia Tech club member; Team Shanghai; Designed and 3D Printed tee signs for local courses
- *Other Sports:* Table tennis(Regional Top 16 in Shanghai), Volleyball(High School Varsity Captain and 4th place in Shanghai)
- *Creative Writing:* Authored two science fiction novels and multiple dystopian short stories, learning screenwriting

Relevant Coursework

Introduction to Digital Signal Processing, Digital System Design, Linear Algebra II, Differential Equations, Data Structures and Algorithms, Introduction to Discrete Math (Honors)
